Comments
(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

#1. The examiner chose to perform solubility tests on	the K. fibers. Infrared an	alysis was ava	ilable at this time
and is a much more specific analysis and allows for the	e determination of the p	olymer sub-cl	ass of a synthetic
fiber. Infrared analysis should have been performed or	n beige and gray K and (Q fibers.	·
#2. The results are not adequately documented in the	notes. The notes are not	dated and are	in pencil. The
technician did not initial the notes. The spectra for the	beige known fiber is m	arked "K1" an	d should be
"K2". The hair was deemed unsuitable for comparison	with no documented re	ason or explar	nation.
